

BISHESH KHADKA

(708) · 646 · 3598

bkhadka@mit.edu

EDUCATION

Massachusetts Institute of Technology

2014-2018

B.S. Candidate in Electrical Engineering & Computer Science

| | | | |
|-------|---------------------------|-------|-----------------------------------|
| 6.824 | Distributed Systems | 6.046 | Design and Analysis of Algorithms |
| 6.172 | Performance Engineering | 6.033 | Computer Systems |
| 6.819 | Computer Vision | 6.036 | Introduction to Machine Learning |
| 6.008 | Introduction to Inference | 6.005 | Software Construction |

TECHNICAL EXPERIENCE

eero

May 2017 - Aug 2017

Software Engineer Intern

San Francisco, CA

- Extended capabilities of eero's cloud services to support haipin NAT, multiple IPs, and Thread.
- Redesigned speed test pipeline to significantly reduce user wait time.
- Eliminated technical debt for user facing cloud features in Scala.

MIT Brain and Cognitive Science

Sept 2017 - Now

Undergraduate Researcher

MIT

- Modeling complex causal interactions with probabilistic programming languages.

NVIDIA

May 2016 - Aug 2016

Software Engineer Intern

Santa Clara, CA

- Researched wireless protocol enhancements; simulated the client-side optimizations with C sockets.
- Deployed a command-line based test system for Android connectivity in Python as an infrastructure tool.
- Created a full-stack webtool for connectivity bug report parsing with Django & SQL.

MIT Media Lab

Feb 2016 - June 2016

Undergraduate Researcher

MIT

- Optimized data pipeline for Google Maps based training data in MATLAB for the StreetScore project.

Hadron Industries

Jan 2016

Software Engineer Intern

Cambridge, MA

- Developed a 3-D Geometry based framework for monitor displays using WebGL/JavaScript.
- Prototyped a gesture-control based UI to interface with the 3-D framework.

NVIDIA

June 2015 - Aug 2015

Software Engineer Intern

Santa Clara, CA

- Designed and built automation tools using Python and ADB for bandwidth estimating, and testing WiFi and BT on Android clients.
- Visualized and analyzed WiFi and Bluetooth statistics extracted from Mobile devices using NumPy and matplotlib.

LEADERSHIP

StartLabs

2014 - 2016

Co-Director & Organizer

MIT

- Led and organized MIT's largest undergraduate entrepreneurship club
- Managed StartLab's network of Boston area startups and VCs to put on events such as startup treks and speakers series.

SKILLS

C · Python · Java · Go · Scala · Django · MATLAB · Javascript · SQL · TCP/IP · WireShark
